

Pompe de détartrage automatique pour générateur de vapeur desineo série pro

Air extraction fan for Desineo pro series steam generator

The air extraction fan designed for the Desineo Pro Series steam generator offers an effective solution for maintaining a comfortable environment in your hammam space. It is necessary to have a minimum 12V DC 3A transformer for its operation independent of the Desineo Pro Series steam generator.

Find all the accessories and spare parts in our section dedicated to hammam accessories.
